MOHAMED ABDELRRAHMANE ZIDOUN

Full-Stack Developer & AI Engineer

Blida, Algeria | +213 770 35 92 85 | abdelrrahmane.zidoun@gmail.com

Scan for more details

PROFESSIONAL SUMMARY

Full-Stack Developer and AI Engineer with expertise in building enterprise-grade web and mobile applications. PhD in Artificial Intelligence and Autonomous Systems with specializations in computer vision, reinforcement learning, and natural language processing. Successfully delivered multiple production applications on Play Store and App Store for major clients including Mobilis, Algerie Telecom, and government ministries. Co-founder of two tech startups specializing in AI, IoT, and precision agriculture solutions. Holder of 2 registered patents and author of peer-reviewed scientific publications.

TECHNICAL SKILLS

Languages:	Python, Dart, PHP, JavaScript, TypeScript, HTML5, CSS3, SQL
Mobile:	Flutter (iOS/Android), Cross-platform development, App Store & Play Store deployment
Backend:	Django, FastAPI, Laravel, Node.js, REST API design
AI/ML:	TensorFlow, Computer Vision, NLP, Reinforcement Learning, OCR, Face Recognition
Databases:	PostgreSQL, MySQL, SQLite, Firebase
DevOps:	Git, Docker, Linux servers, CI/CD, Cloud deployment

PROFESSIONAL EXPERIENCE

Co-Founder & Managing Director

Feb 2025 - Present

Smart Field Solutions | Birtouta, Algeria

- Founded AgriTech startup focused on precision agriculture using IoT and AI
- Developed smart farming platform integrating satellite imagery (NDVI), IoT sensors, and data analytics
- Led R&D initiatives for crop monitoring, irrigation optimization, and yield prediction

R&D Consultant

Mar 2023 - Present

DataMindX | Blida, Algeria

- Co-founded technology consulting firm specializing in AI, IoT, and custom software development
- Delivered 8+ mobile applications for diverse clients including government ministries
- Designed and implemented AI models for OCR, document processing, and biometric verification

Front-End & Mobile Consultant

Aug 2024 - Aug 2025

Mobilis | Bab Ezzouar, Algeria

- Developed and optimized web and mobile interfaces for Algeria's leading telecommunications provider
- Built POS Manager application handling contract creation, digital signatures, and PDF generation
- Implemented NFC-based ID card scanning for customer verification, reducing onboarding time by 60%
- Created LinkMaster platform for distributor management with automated commission calculations

R&D Team Lead

Jun 2023 - Jun 2025

RUDN University | Moscow, Russia

- Directed research projects in autonomous systems, robotics, and machine learning
- Supervised multidisciplinary teams; contributed to 2 patents and multiple publications
- Developed algorithms for real-time robot navigation using visual data only

Head of SI & Data Applications Department

Dec 2023 - Dec 2024

Icosnet | Cheraga, Algeria

- Managed IT systems, data security, and application development for ISP company

- Supervised development team and oversaw deployment of customer-facing applications

Mobile Application Developer

Jul 2022 - Nov 2023

Icosnet | Cheraga, Algeria

- Developed 5+ Flutter applications for iOS and Android platforms
- Built Whowiaty: biometric ID verification app with NFC chip decryption technology
- Created V-Room video conferencing platform with real-time communication features

Full-Stack Developer

Jul 2020 - Apr 2022

WakeApp | Moscow, Russia (Remote)

- Developed mobile and web applications for international clients using PHP and Flutter
- Managed complete project lifecycle from requirements gathering to production deployment

KEY PROJECTS

Cortixia Chat - Secure Messaging Platform *| Flutter, Matrix Protocol, FastAPI, WebRTC*
- Architected end-to-end encrypted messaging app with AI-powered real-time translation (20 languages)
- Integrated WebRTC for video/audio calling and speech-to-text transcription
- Deployed cross-platform solution (Android, iOS, Web, Desktop) with custom Matrix backend

Djezzy POS - Enterprise Point of Sale System *| Django, Flutter, Chart.js*
- Built complete POS solution for major telecom operator handling contracts and inventory
- Developed NFC-based ID card scanning extracting data from biometric chips
- Implemented digital signature capture and automated bilingual PDF contract generation

Whowiaty - Biometric Identity Verification *| Flutter, Python, NFC*
- Developed proprietary algorithm for decrypting NFC chips in Algerian ID cards and passports
- Integrated AI models for face matching and document authenticity verification
- Published on Play Store and App Store for enterprise identity verification

Coffre Intelligent - Smart Safe System *| Flutter, Python, ESP32, AI*
- Engineered IoT-based smart safe solution for Algerie Telecom with OCR and face-matching AI
- Built hardware integration with ESP32, cameras, and scanners for biometric verification

Smart Field App - AgriTech Platform *| Django, PostgreSQL, IoT*
- Created precision agriculture platform with satellite imagery analysis (NDVI) and IoT sensors
- Developed crop tracking, irrigation management, and yield optimization features

Farmers Marketplace - Agricultural Trading Platform *| Django REST API, Flutter*
- Built mobile marketplace connecting Algerian farmers with wholesale traders
- Implemented location-based filtering, OTP authentication, and interest tracking

ZAKAT Platform - Charity Management System *| Django, Tailwind CSS, OCR*
- Developed Islamic charity management platform with OCR-based document processing
- Created Arabic RTL interface with multi-step workflow automation

Video Conferencing Solutions (AT Meet, V-Room) *| Flutter, Jitsi, WebRTC*
- Developed enterprise video conferencing apps for Algerie Telecom and Icosnet
- Implemented OTP authentication, guest access, and multi-language support

LinkMaster - Distributor Management *| Flutter, Django, Vue.js*
- Built distributor management platform for Mobilis with automated commission calculations
- Developed modular architecture for orders, products, and sales objectives tracking

Mobile Self-Care Apps (My Mobilis, SelfCare Icosnet) *| Flutter, PHP, REST API*
- Developed customer self-service applications for Mobilis and Icosnet subscribers
- Published on Play Store and App Store with full account management features

MHUV - Ministry of Housing App *| Flutter, PHP*
- Custom mobile application for Ministry of Housing, Urbanism and City
- Full-cycle development from UI/UX to deployment on app stores

Additional Published Apps *| Flutter, PHP, Python*
- Chhal Prix: Supermarket price comparison app for customers
- USDB: Custom application for University of Blida 1
- Ibox: Mobile data storage solution for Icosnet
- Frihali Fi Alger: Local services startup application

Banking & Finance Apps *| Flutter, AI, OCR*
- Al Salam Bank KYC: Banking identity verification with AI-powered document processing
- Wallet: Digital wallet application for payments and transactions

Video Conferencing & Communication *| Flutter, Jitsi, WebRTC*

- TT Meets, UniMeet, Mobilis Meetings: Enterprise video conferencing solutions
- Multiple clients including universities and telecom operators

Consumer & Business Apps *| Flutter, REST API*

- Restaurant apps (Resto2, Client): Order management and customer-facing solutions
- Delivery App: Real-time delivery tracking with notifications
- Kitchen App: Recipe management and meal planning
- CAPC: Confederation of Algerian Employers member services
- Camp Tiziri: Fertility clinic mobile app for patient management

Utility & Specialized Tools *| Flutter, NFC, Barcode*

- NFC Reader: Card reader utility for NFC tags
- Tazdam: Barcode/QR scanning for inventory management
- Operations: Workflow tracking and reporting system
- HITS: Audio player with playlist management

EDUCATION

PhD in Artificial Intelligence and Autonomous Systems Sep 2020 - Jun 2025

RUDN University | Moscow, Russia
Research: Policy optimization algorithms for autonomous systems using reinforcement learning and computer vision

Master of Science in Natural Language Processing Sep 2017 - Jul 2019

University of Blida 1 | Blida, Algeria

Bachelor of Science in Information Systems and Software Engineering Sep 2014 - Jul 2017

University of Blida 1 | Blida, Algeria

PATENTS & PUBLICATIONS

Patents (2)

Neuronix SD - Diabetes Prediction Program (No. 2022684789)

Neuronyx PRO - Diabetes Mellitus Prediction (No. 2023617080)

Publications (6 Total: 4 SCOPUS + 2 VAK)

- ML Methods for Heart Disease Prediction (SCOPUS)
- Unsupervised ML Control Techniques (SCOPUS)
- Mobile Robotics: AI & ML Applications (SCOPUS)
- Pulse Wave Analysis with Kohonen Maps (SCOPUS)
- Policy Optimization for Autonomous Systems (VAK)
- Pulse Wave Self-Organizing Maps Analysis (VAK)
