PROFESSIONAL SUMMARY

Full-Stack Developer and Doctor in Artificial Intelligence with expertise in building enterprise-grade web and mobile applications. PhD (RUDN University) with a thesis on AI and autonomous systems, specializing in computer vision, reinforcement learning, and natural language processing. Successfully delivered multiple production applications on Play Store and App Store for major clients including Mobilis, Algerie Telecom, and government ministries. Co-founder of DataMindX, a technology consulting firm specializing in AI and IoT. Co-author of 2 registered software programs (Rospatent) and 5 scientific publications.

EDUCATION

Doctoral diploma (aspirantura completion) — specialty 09.06.01 Informatics and Computer Engineering; qualification: Researcher. Teacher-Researcher Sep 2020 - Jun 2025

RUDN University | Moscow, Russia — awarded 01/07/2025 · recognized as Doctorate by Algerian MESRS equivalence
Thesis topic: AI and autonomous systems — policy optimization algorithms using reinforcement learning and computer vision

Master of Science in Natural Language Processing Sep 2017 - Jul 2019

University of Blida 1 | Blida, Algeria

Bachelor of Science in Information Systems and Software Engineering Sep 2014 - Jul 2017

University of Blida 1 | Blida, Algeria

TECHNICAL SKILLS

Languages: Python, Dart, PHP, JavaScript, TypeScript, HTML5, CSS3, SQL
Mobile: Flutter (iOS/Android), Cross-platform development, App Store & Play Store deployment
Backend: Django, FastAPI, Laravel, Node.js, REST API design
AI/ML: TensorFlow, Computer Vision, NLP, Reinforcement Learning, OCR, Face Recognition
Databases: PostgreSQL, MySQL, SQLite, Firebase
DevOps: Git, Docker, Linux servers, CI/CD, Cloud deployment

PROFESSIONAL EXPERIENCE

CTO — Chief Technology Officer Feb 2025 - Present

Smart Field Solutions | Birtouta, Algeria

- Technical leadership of an AgriTech startup focused on precision agriculture using IoT and AI
- Developed smart farming platform integrating satellite imagery (NDVI), IoT sensors, and data analytics
- Led R&D initiatives for crop monitoring, irrigation optimization, and yield prediction

R&D Consultant Mar 2023 - Present

DataMindX | Blida, Algeria

- Co-founded technology consulting firm specializing in AI, IoT, and custom software development
- Delivered 8+ mobile applications for diverse clients including government ministries
- Designed and implemented AI models for OCR, document processing, and biometric verification

Front-End & Mobile Consultant Aug 2024 - Aug 2025

Mobilis | Bab Ezzouar, Algeria

- Developed and optimized web and mobile interfaces for Algeria's leading telecommunications provider
- Built POS Manager application handling contract creation, digital signatures, and PDF generation
- Implemented NFC-based ID card scanning for customer verification, reducing onboarding time by 60%
- Created LinkMaster platform for distributor management with automated commission calculations

R&D Team Lead

Jun 2023 - Jun 2025

RUDN University | Moscow, Russia

- Directed research projects in autonomous systems, robotics, and machine learning
- Supervised multidisciplinary teams; co-authored 2 registered software programs (Rospatent) and multiple publications
- Developed algorithms for real-time robot navigation using visual data only

Head of SI & Data Applications Department

Dec 2023 - Dec 2024

Icosnet | Cheraga, Algeria

- Managed IT systems, data security, and application development for ISP company
- Supervised development team and oversaw deployment of customer-facing applications

Mobile Application Developer

Jul 2022 - Nov 2023

Icosnet | Cheraga, Algeria

- Developed 5+ Flutter applications for iOS and Android platforms
- Built Whowiaty: biometric ID verification app with NFC chip decryption technology
- Created V-Room video conferencing platform with real-time communication features

Full-Stack Developer

Jul 2020 - Apr 2022

WakeApp | Moscow, Russia

- Developed mobile and web applications for international clients using PHP and Flutter
- Managed complete project lifecycle from requirements gathering to production deployment

KEY PROJECTS

Digital Identity & Biometrics (eKYC)

- White-label eKYC suite deployed for BEA, Bank ABC, Algérie Poste, and CAAR: document scanning, biometric chip reading, liveness detection, and face matching
- Whowiaty: biometric identity verification app — published on Play Store and App Store
- DZ Biometry: 100% offline reading of Algerian biometric documents (ID card, passport, driving licence), trilingual AR/FR/EN
- Al Salam Bank KYC: banking identity verification with AI-powered document processing

Video Conferencing, Messaging & Communication

- Visio: professional video conferencing platform (Web, Android, iOS) with AI-generated meeting summaries — in production
- Cortixia Chat: secure end-to-end encrypted messenger with real-time translation (20 languages) — Android, iOS, Web, Desktop
- Beep: encrypted messenger with audio/video calls — production server deployed
- AT Meet, V-Room, TT Meets, UniMeet, Mobilis Meetings: enterprise video conferencing for Algérie Télécom, Icosnet, Mobilis, and universities
- UniMail: enterprise mobile e-mail client

Telecom & Distribution Networks

- Djezzy POS: complete point-of-sale solution with ID card reading and automated bilingual contract generation
- POS Manager & CSM (Mobilis), Ooredoo POS: point-of-sale, contract, and digital-signature management
- LinkMaster: Mobilis distributor management platform with automated commission calculations
- My Mobilis & SelfCare Icosnet: self-care apps published on Play Store and App Store

AgriTech

- Smart Field App: precision agriculture platform with satellite imagery and connected sensors
- Farmers Marketplace: mobile marketplace connecting farmers and wholesale traders

Education & University

- Ch7al Jebt? (شحال جيت؟): BEM & BAC average calculator with university orientation guide — Play Store & App Store
- Bac Quiz DZ: offline BAC exam preparation covering 9 streams
- ELN-203: student reclamations portal for University of Blida 1 — in production
- USDB: custom mobile application for University of Blida 1

Public Sector & Institutions

- MHUV: Ministry of Housing, Urbanism and City app — published on the stores
- ZAKAT Platform: Zakat management with Arabic RTL interface and automated document processing
- Damancom 2.0: CASNOS portal redesign concept with contribution simulator and AI chatbot (demo)
- Coffre Intelligent: connected smart safe with biometric verification for Algérie Télécom

Consumer & Utility Applications

- Wallet: digital wallet for payments and transactions
- Wach Ntiyeblak, Chhal Prix, Frihali Fi Alger: Algerian consumer apps
- GDNC Services: multilingual study-in-Russia platform (web + mobile app)
- Camp Tiziri: fertility clinic mobile app for patient management
- Resto2, Delivery App, Kitchen App, Ibox, NFC Reader, Tazdam, Operations, HITS: various business and utility apps

PUBLICATIONS & REGISTERED SOFTWARE

Publications (5: 4 peer-reviewed journal articles + 1 conference communication)

- Comparative Analysis of Machine Learning Methods for Prediction of Heart Diseases. *J. of Machinery Manufacture and Reliability*, 51(8), 2022. DOI: 10.3103/S1052618822080210
- Unsupervised Machine Learning Control Techniques for Solving the General Synthesis of Control System Problem. *Int. J. of Intelligent Engineering and Systems*, 17(3), 2024. DOI: 10.22266/ijies2024.0630.32
- Elevating Mobile Robotics: Pioneering Applications of Artificial Intelligence and Machine Learning. *Revue d'Intelligence Artificielle*, 38(1), 2024. DOI: 10.18280/ria.380137
- Cluster-Analysis of Human Pulse Wave by Self-Organizing Kohonen Maps to Identify Markers of Age Groups. *Russian Journal of Biomechanics*, 28(3), 2024. DOI: 10.15593/RJBiomech/2024.3.12
- Application of Deep Reinforcement Learning for Unmanned Aerial Vehicles. *Int. Scientific-Technical Conf. of Young Researchers*, Belarusian-Russian University, Mogilev, Oct 2022 (communication)

Registered software programs — co-author (Rospatent)

- Neuronix SD — Diabetes Prediction (registration No. 2022684789, 2022)
- Neuronix PRO — Diabetes Mellitus Prediction (registration No. 2023617080, 2023)
